Known for our vast selection of brush products, resourceful custom-design capabilities and exceptional customer service, Tanis Brush is an industry leader in brush manufacturing.

Since 1987, our team has remained committed to providing our customers with total customer satisfaction throughout the entire customer buying experience.

Our ISO 9001: 2015 and ISO 13485: 2016 certifications bring excellence into our daily work environment and encourages us to persistently question and improve our processes, fostering a culture of quality and continuous improvement.

Thermochromic Strip brushes are the perfect brush for gauging temperature change. The temperature controlled material changes from gray to white approximately between 116°-124°F (47°-51°C) degrees Fahrenheit. These brushes are ideally used in data centers and control rooms to visibly see temperature changes in order to protect servers and other important electrical components from damage.

Thermochromic Strip Brushes

Don’t see an exact match to fulfill your needs? Tanis can customize a brush to meet your requirements.
