Wood and Metal Sanding Brushes for Superfici Machines

Our sanding product offering which include CERAMIX® abrasive filament, silicon carbide, and wire filament are made for Superfici machines and have a M14 thread type. We also offer sand paper Tampico discs and Combi discs which are a combination of bonded and coated abrasives. These products are useful for surface finishing in both the wood and metal industries. CeramiX® abrasive brushes contain 3M™ grain 321 that provides enhanced cutting action up to 3 to 5 times faster than traditional abrasive filaments. The mineral wears away in smaller pieces, consistently leaving more mineral in the filament to work on the part surface. Give us a call for your required specifications and a Tanis Product Specialist can design a product for you!

APPLICATIONS

- Rounding of sharp edges
- Removal of burrs
- Removal of oxide from thermal cut edges

*CeramiX® and DMC are subsidiaries of SCM Group*
Technologies
- Composite Cylinder and Rotary Power Strip Stapled Set Twisted-In-Wire Utility

Industries
- Aerospace Agriculture Automotive Data Centers Electronics Food Service Equipment Glass Metal Working Medical

Industries
- Packaging Pharmaceutical Printing Oil/Gas Steel Mill Textile Transportation Warehousing Woodworking

Applications
- Cleaning Decontamination Flow Control Maintenance Sealing Sorting Surface Finishing Surface Preparation Weather Seal
